

Fix It Iraq — Store submission guide

App: Fix It Iraq (Salla7ha) | Bundle: com.fixitq.app | Version 1.0.0, build 17

API & legal: <https://fixthecar.app> | Support: admin@fixthecar.app

Sign-in (v1): Google + Apple only. No SMS OTP. Shop phone: manual entry, not verified (v2 may add OTP).

Phase 0 — Pre-flight

Item	Action
API	fly deploy — fixthecar.app healthy
Privacy / terms	Live at #/privacy and #/terms
Firebase	Google + Apple enabled (fixit-9191d)
Android Google SHA	Play App signing SHA-1 in Firebase (Play Console → App integrity; never hand-type)
google-services.json	Regenerate after SHA changes; included in EAS Android build
Secrets (local)	mobile/play-service-account.json, mobile/asc-api-key.p8
Paywall	Disabled v1 — declare NO in-app purchases

Phase 1 — Build & upload

- `npx eas-cli build --platform all --profile production --non-interactive`
- `npx eas-cli submit --platform ios --profile production --latest --non-interactive`
- `npx eas-cli submit --platform android --profile production --latest --non-interactive`

Android: EAS → internal DRAFT. You must Start rollout in Play Console.

iOS App Store Connect app ID: 6762974915.

Phase 2 — Smoke test (Play internal or TestFlight, NOT Expo Go)

- Splash = Fix It wrench (build 17+)
- Google sign-in (Android from Play install)
- Apple sign-in (iOS)
- Owner: repair / parts / towing / Tuktok-Motor posts
- Car shop feed: car repair/parts only
- Tuktok/Motor shop: tuktok/motor repair/parts only (not car, not towing)
- Towing shop: towing only
- Bid → accept → chat
- Push on bid (optional)
- Profile → Delete account
- Legal links + support email on profiles
- Arabic UI on key flows

Phase 3 — Store listing

Field	Value
Store name	Fix It Iraq

Field	Value
Description	Iraq marketplace: owners post repair, parts, towing; shops bid
Privacy	https://fixthecar.app/#/privacy
Terms	https://fixthecar.app/#/terms
Support	admin@fixthecar.app
Website	https://fixthecar.app
Category	Auto & vehicles / Business (marketplace)
Countries	Iraq-first

Graphics: Play feature 1024×500 + screenshots; App Store 6.7" and 6.5" screenshots; icon 1024×1024.

Phase 4 — Reviewer test accounts

Two Google accounts (email + password). Do NOT share Apple ID password.

Account	Pre-setup on your phone
Owner Google	Car owner → Baghdad + district → 1 active post
Shop Google	Full shop setup + contact phone (+964) → confirm feed

- Install → Continue with Google → Add account → enter email/password
- Phone is NOT used to sign in (shops enter contact phone at signup only)
- iOS: reviewers may also use Sign in with Apple with their own Apple ID

App Store Connect — Review notes (paste)

Fix It Iraq – Iraq marketplace (car repair, parts, towing). Sign-in required.

SIGN-IN: Google (iOS + Android). Apple Sign-In also on iOS.

Phone numbers are NOT used to sign in.

TEST ACCOUNTS (Google):

1) CAR OWNER (pre-setup)

Email: fixit.review.owner@gmail.com

Password: [PASSWORD]

Already has profile + one active post in Baghdad.

2) SHOP (pre-setup)

Email: fixit.review.shop@gmail.com

Password: [PASSWORD]

Shop profile complete. Feed → bid on owner's post.

OWNER FLOW: Continue with Google (owner) → see My Posts / create request.

SHOP FLOW: Log out → Continue with Google (shop) → Feed → place bid.

Shop signup includes contact phone (+964, 9-10 digits after country code).

No SMS verification in v1.

SHOP TYPES: Car shop, Tuktok/Motor shop, and Towing provider are separate shop types with different feeds.

OTHER:

- No in-app purchases in v1.0
- Payments agreed off-app between users
- Privacy: <https://fixthecar.app/#/privacy>

- Support: admin@fixthecar.app
- User-generated content (posts, photos, chat) can be reported in-app (menu)

OPTIONAL – FRESH SIGNUP:

Profile → Delete account (removes profile, posts, and shop data).

After deletion, sign in again with the same Google account to test full signup.

Google Play — App access (paste)

Sign-in via Google is required (all Android devices).

Test account – CAR OWNER (pre-setup):

Email: fixit.review.owner@gmail.com

Password: [PASSWORD]

Test account – SHOP (pre-setup):

Email: fixit.review.shop@gmail.com

Password: [PASSWORD]

Steps: Install → Continue with Google → use credentials above.

Shop accounts enter an Iraqi contact phone during signup (+964, 9-10 digits).

This is NOT SMS-verified and is NOT used to sign in.

Full marketplace test: owner post visible; shop signs in and bids from Feed.

Optional: Profile → Delete account to test fresh signup with same Google account.

Phase 5 — Google Play Data safety

- Privacy URL: <https://fixthecar.app/#!/privacy>
- Collects or shares data? Yes
- Encrypted in transit? Yes (HTTPS/TLS)
- Users can request deletion? Yes — Profile → Delete account or admin@fixthecar.app
- Account creation: OAuth (Google, Apple). Cannot use app without sign-in.
- Data sold? No | Ads/marketing use? No | UGC? Yes | Moderation? Yes | IAP? No

For each type: Collected=Yes, Shared with third parties for their own use=No (Firebase/Expo/Fly/R2 are processors). Shared with other users=Yes where noted.

Data type	Collected	Shared (users)	Optional	Purpose
Precise location	Yes	Yes (towing; workshop pin)	Optional	App functionality
Name	Yes	Yes	Required	App functionality, Account management
Email	Yes	No	Required (Google/Apple)	Account management
Phone (shops)	Yes	Yes (shop profile)	Required for shops	App functionality
Address	Yes	Partial (city/district)	Required for matching	App functionality

Photos	Yes	Yes (on posts)	Optional on posts	App functionality
App interactions	Yes	Yes (posts/bids)	Required for core use	App functionality
Device ID (FCM)	Yes	No	Optional (deny notifications)	App functionality

Do NOT declare: payment info, health, audio, files, calendar, contacts, browsing history, crash/analytics SDKs, advertising ID, SMS/OTP sign-in (not used in v1).

Phase 6 — App Store App Privacy

- Collect data? Yes | Tracking? No | Third-party ads? No
- Sign in with Apple: Yes (required — you offer Google)
- Encryption: standard only (ITSAAppUsesNonExemptEncryption false)

Data type	Collected	Linked	Tracking	Purposes
Name	Yes	Yes	No	App Functionality, Account Management
Email	Yes	Yes	No	App Functionality, Account Management
Phone (shops)	Yes	Yes	No	App Functionality
Physical Address	Yes	Yes	No	App Functionality
Precise Location	Yes	Yes	No	App Functionality
Coarse Location	Yes	Yes	No	App Functionality
Photos or Videos	Yes	Yes	No	App Functionality
Other User Content	Yes	Yes	No	App Functionality
User ID	Yes	Yes	No	App Functionality, Account Management
Device ID (push)	Yes	Yes	No	App Functionality

Do NOT declare: Purchases, Payment Info, Browsing/Search History, Usage Analytics, Diagnostics/Crash, Contacts, Health, Financial.

Phase 7 — Questionnaire quick answers

Question	Answer
User-generated content?	Yes — posts, photos, chat, reviews
Moderation / reporting?	Yes — in-app reports + admin@fixthecar.app
In-app purchases?	No (v1.0)
Payments in app?	No — agreed off-platform
Physical services off-app?	Yes — repair/towing between users
Location?	When in use — towing, workshop pin
Sign-in methods	Google, Apple
Target audience children?	No / not primarily under 13

Phase 8 — Submit order

- 1. Install build 17 (TestFlight / Play internal) — smoke test
- 2. Play: listing + Data safety + content rating + App access notes
- 3. App Store: App Privacy + age rating + review notes
- 4. iOS: Submit for Review (build 17)
- 5. Android: Roll out internal → Closed/Open → Production
- 6. Google DEVELOPER_ERROR = Play App Signing SHA missing in Firebase
